BUSINESS PHILOSOPHY: FAIR DEAL BUSINESS

- Fair to all Customers, Consumers, Suppliers, Buyers, Dealers, Workers, Community and Society at large.
- Our Customers must profit first, our company next.
- Quality first, profits next.
- Goodwill first, profits next.
- Excellence first, profits next.
- Best of the world technology first, profits next.
- India first, profits next.
- Employee Welfare.

WHY TO USE 'T.T.' YARN?

- Low Count C.V.
- Low Hairiness
- Better Fabric Appearance
- Uniform dye pick-up, better lusture and low spirality
- Less Imperfections
- Low Classimate Faults
- Low Contamination
- Own ginned cotton
- Use Shankar Cotton

T.T. YARN IS IDEAL FOR ALL TYPES OF KNITTED AND WOVEN FABRICS

Our yarn is OEKO-Tex certified and is made from best available raw material. The mills are geared for 100% cotton combed/carded knitting and weaving in count range Ne 16/1 to 60/1. We can offer following yarn also:

- Organic Yarn in combed from Ne 20/1 to 50/1
- Global Recycled Yarn
- Fair Trade Yarn.
- BCI Yarn.
- C&A Approved Yarn.

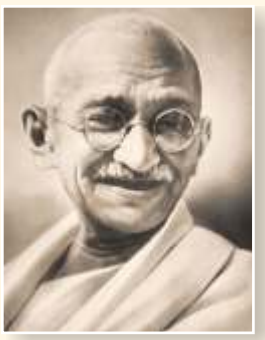
All individual cones are passed through ultra violet rays for detection of shade variations.

- Count C.V % Guaranteed Less than 1.5%.
- Imperfections to match the highest Uster standards.
- Cone Angles 5º57' / 3º20' /4º30'.
- Yarn Content 1.0 kg to 2.2 kg/cone as desired.

THE USTER STATISTICS-A UNIVERSAL LANGUAGE OF QUALITY

- T.T. uses the Uster statistics as a quality benchmark, and thereby presents the merchandiser with a completely reliable standard, lot after lot.

- Fibre and Yarns are strictly monitored at every stage. Testing is carried out on the latest testing equipment like H.V.I. UT-4 and USTER-CLASSIMAT.



- Mahatma Gandhi

Our Customer Policy

A customer is the most important visitor to our Premises. He is not dependent on us. We are dependent on him. He is not an interruption on our work. He is the purpose of it. He is not an outsider on our business. He is a part of it. We are not doing him a favour by serving him. He is doing us a favour by giving us an opportunity to do so.

HIGHLIGHTS

- ISO 9001 approved quality control
- OKO-Tex Certified
- Control Union Certified for Organic Yarn (GOTS & OE)
- Control Union Certified GRS (Global Recycled Standard)
- State of the art machinery
- Fair Trade approved
- Best cotton initiative (BCI) approved

LOW HAIRINESS

- Conditioning of yarn
- Special testing for piling effect

SPECIALLY SELECTED COTTON

- Provides better lusture
- Effective dye absorption
- Lesser Contamination

MINIMUM CONTAMINATION

- Team deputed at ginning stations to select best cotton.
- Quantum clearers installed in winding.
- Manual Picking of contaminants in blow room
- Cotton pass through ultra-violet contamination remover
- Visual shield installed at blow room

FROM FIBRE TO YARN

SELECTION OF RAW COTTON

Cotton quality is paramount and the back bone of our mills.

We use our own ginned cotton i.e. TT COTTON<<THE BEST COTTON IN INDIA>> We have ultra modern ginning Mills in Gujarat, producing CONTAMINATION Controlled and low trash Shankar Cotton. To ensure uniform yarn quality from the first meter to last. T T has systematically pursued ambitious goal of using uniform quality of good Cotton.

ISO-9001 CONFIRMS T T QUALITY THINKING

A certified quality assurance system is mandatory to maintain discipline in the production line.

The ISO-9001 standard offers a model quality Assurance System. They offer a base on which a company can build a quality structure.

The ISO-9001 certification enables us to meet customer's wishes, needs and problems. It provides us with new ideas and suggestions for optimisation. The culture of things "WELL DONE" professionalism, customer satisfaction and the enthusiasm for our work has made us improve our quality system leading up to ISO-9001 certification.

The Company has also taken OEKO-Tex Certification to match upto European environmental standards. This further strengthens our commitment to the environment.

The company has also taken certification for organic yarn, recycled yarn, fair trade yarn and BCI yarn.

TOWARDS CONTAMINATION FREE YARN

The fusion of human brain with technology and care fully selected cotton has led to effective control of contamination in yarn.

Introduction of Contamination removing machine at Blow Room and in Winding are some of the counter measures that have been adopted to minimize contamination levels. This is apart from manual removal of contaminants.

Foreign materials such as polypropylene, hair jute etc. are distinguished from the pure textile fibers, and eliminated if the programmed tolerance limits are exceeded.

THE VISION SHIELD-FROM JOSSI- SWITZERLAND,Installed in blow room.

Contaminants like polypropylene are detected through the flourescent effect.
